

Radiological Technician

Job Duties/Responsibilities:

Apply basic to mid-level radiological protection skills in a nuclear environment. Working with more experienced coworkers, and under the direction of supervision, carry out assigned radiological support for all AMWTP operations including the performance of radiological surveys of work areas and personnel, the use and calibration of radiological equipment, the performance of radiological calculations, and the operation of rolling stock. Job performance will be carried out in a radiological and hazardous work environment that will require the wearing of job specific PPE including respirators and full body protection.

Minimum Qualifications/Skills Requirements:

- 1- High school diploma or equivalent
 - 2- Current DOE RCT Core training or equivalent
 - 3- Experience as a qualified RCT
 - 4- The ability and willingness to work rotating shifts
-
